

Finally, the `compose()` function combines any number of functions into one function:

```
1 n_unique <- compose(length, unique)
2 # The composition above is the same as:
3 # n_unique <- function(x){
4 #   length(unique(x))
5 # }
6
7 rep(1:5, 1:5)
8 [1] 1 2 2 3 3 3 4 4 4 4 5 5 5 5 5
9
10 n_unique(rep(1:5, 1:5))
11 [1] 5
12
```
