Assignment: Swirl Lesson

← Week 1

### DM I am not able to see the assignments

DAVID RAJ M Assignment: Swirl Lesson · a year ago · Edited

In the swirl assignment page, it show me that

- 1 Complete the following assignments in swirl. Submit your completion status at the end of each lesson for credit.

But I could not see any assignment over there.

**Deadline** Pass this assignment by May 6, 11:59 PM PDT

**Instructions**

My submission

Discussions

Complete the following assignments in swirl. Submit your completion status at the end of each lesson for credit.

#### How to submit

Copy the token below and run the submission script included in the assignment download. When prompted, use your email address **davidraj.m@learner.manipal.edu.**

**w5v22KcUd6SNxNWE**

This token expires in 23 minutes  
[Generate new token](#)

Your submission token is unique to you and should not be shared with anyone. You may submit as many times as you like.

How to solve this issue?

the assignment is that you have to configure swirl. run the following :

```
1 library(swirl)
2 swirl()
3 # Choose the Advanced R Programming lesson (you
  have to install it first)
4 # Choose 1: Setting up swirl
5 # Proceed ...
```

Run:

```
1 swirl::install_course("Advanced R Programming")
```

Then swirl() , and select "Advanced R Programming", and you will see a list of lessons.

There are two options. One is through swirl and in the other option they have mentioned "Question 1

Functions

Copy the code you received at the end of the swirl lesson and paste it into the corresponding question below."

**I am not getting this. I haven't received any code at the end of swirl lesson.**

EB Elizabeth BETTS · a year ago

I have the same problem, I can see my assignment token to enter into Swirl when the assignment is done, but nothing else? I assume we are doing the exercise called 'functions' - but are there any other swirl lessons we need to do for this week as well?

You just have to complete the assignments on Swirl. You once the token number generated above to connect swirl to your coursera account.

I do this, and have been trying many times to complete these assignments but the grade submission in RStudio continues to fail. I have tried generating a new token from Coursera and re submitting however still getting the grade submission failure message from R. I have tried on both home and work laptops. I have twice previously raised this problem but with no response :(
